

Syntax Highlighting

To better structure and improve readability of your code you can use syntax highlighting in Eclipse4GL.

Syntax highlighting is available for the following options:

To apply syntax highlighting to your code

1. In the Eclipse **IBM/Informix 4GL Development** perspective open a file.
2. In **Eclipse** go to **Window > Preferences > Eclipse4GL > Syntax Highlighting**.
3. Choose your colors.
4. Click **Apply and Close**.
5. Exit and restart the Eclipse IDE to apply changes.

```
d4_globals.4gl
1 DATABASE stores7
2
3 GLOBALS
4   DEFINE
5     p_customer RECORD LIKE customer.*,
6     p_orders RECORD
7       order_num LIKE orders.order_num,
8       order_date LIKE orders.order_date,
9       po_num LIKE orders.po_num,
10      ship_instruct LIKE orders.ship_instruct
11   END RECORD,
12   p_items ARRAY[10] OF RECORD
13     item_num LIKE items.item_num,
14     stock_num LIKE items.stock_num,
```
