## Road to version 0.6.x and upcoming

The following new features are planned for future releases:

- Quick-Outline
- Own 4GL project type
- Context menu enhancements (refactoring)
- Code navigation support (such as "f3 open declaration")

## ... announced Version 0.5.3

:: 11.2019 ::

With support for Java SE 13 on Eclipse IDE 2019/09 will be available soon. Currently in beta testing.

## Version 0.5.2

:: 10.2019 ::

Fixed localisation issue causing an error due to installation if (eclipse.ini) parameter "-Dosgi.nl=fr\_FR" is used.

*(Cannot complete the install because some dependencies are not satisfiable  
org.eclipse.equinox.p2.iu; com.chilobytes.eclipse4gl.feature.group  
cannot be installed in this environment because its filter is not applicable.)*

## Version 0.5.1

:: 10.2019 ::

The following new feature is planned for this release:

- [File templates](#) (Version 0.5.1 Preview)

## Version 0.5.0

:: 09.2019 ::

The following new feature has been added for this release:

- [Code templates](#) (Version 0.5.1 Preview)

## Version 0.4.9

:: 06.2019 ::

Fixes compatibility issues with the latest versions of the Eclipse IDE.

## Version 0.4.8

:: 05.2015 ::

Fixed an issue where ...

- Unless on the same line a Globals include statement wouldn't display in the outline tab of the IBM/Informix 4GL Development perspective in Eclipse.

## Version 0.4.7

:: 04.2015 ::

Resolves the following issues:

- Functions are parsed as local globals
- Content assistant keyword proposal fails after opening parantheses
- Global Keywords color defined in preferences is not applied in workspace
- Content assistant keyword conversion should also apply to templates
- Editor cursor position does not display line/colum numbers in status bar
- Function rendering with arguments line breaked / multiline argument list
- Eclipse 4 Compatibility

- Missing Keywords

## Version 0.4.6

.: 09.2009 .:

Initial release of the Eclipse4GL Plug-In.
